

GPS STUDENT SAFETY PASSPORT

A Message for Parents

You've prepared them for the adventure. Let us prepare them for the unexpected.

You're About to Spend Thousands on Their Study Abroad Experience.

Tuition. Flights. Housing. Meals. Weekend trips. You've likely invested a significant amount of money to give them this unique opportunity.

Now ask yourself:

"What have I spent to protect that investment—and my child—while they're there?"

For about the same as a daily coffee and a streaming subscription, you can add a professional security team to their experience.

What Keeps Parents Up at Night

Your Fear	Reality Without GPS	Peace of Mind With GPS
"What if they get sick and don't know where to go?"	They Google "hospital near me" in a panic, hoping it's safe.	They open the app and see the nearest vetted hospital instantly.
"What if they're lost at 2 AM?"	They wander unfamiliar streets, trying to figure out who to call.	They press one button and an English-speaking specialist guides them home.
"What if something serious happens—an accident, a crime, a crisis?"	You're an ocean away, helpless, refreshing news sites.	We have agents on the ground in Europe who can reach them in person.
"What if I can't reach them?"	Hours of panic, calling and texting with no response.	We have real-time emergency tracking and can locate them.
"Does my child even know the emergency number in Europe?"	Probably not. (It's 112, by the way—different from 911.)	One button. No thinking required.

What You're Actually Paying For

What You Get	Why It Matters
A Dedicated Security Specialist	Not a call center. Not a chatbot. One professional who knows your child's specific city—the safe areas, the risks, the hospitals, the police stations. They become a familiar, trusted resource.
24/7 English-Speaking Hotline	At 3 AM, when your child is scared, lost, or in trouble, they get an immediate answer from someone trained to handle emergencies—not a voicemail or automated system.
On-the-Ground Agents in Europe	If a situation escalates—a medical emergency, a mugging, a natural disaster—we don't just stay on the phone. We dispatch a real person to their location. This is not an app feature. This is professional security.
Emergency Tracking	In a crisis, your child can share their location with us. If they can't speak, we can still find them. If they're disoriented, we guide them to safety.
Smart Safety Map	Even without Wi-Fi or data, they can see the nearest vetted hospitals and police stations. No guessing. No wandering.
One-Button Emergency Call	No confusion about 911 vs. 112 vs. 999. One tap connects them to the correct local emergency services based on their exact location.

The Cost Breakdown:

What \$798/Month Really Buys [\$26 per day]

Let's put this in perspective against everyday expenses you already cover.

When you add it all up, most parents spend \$798/month on things that come and go—coffee, subscriptions, takeout, convenience purchases.

The question isn't "Can I afford \$798/month, \$26 a day?"

The question is: "What else am I spending this on—and what's more important than my child's safety?"

Everyday Expense	Monthly Cost	Compared to GPS
Daily specialty coffee (one per day, \$5)	\$150	GPS costs about 5 coffees per day
Streaming services (Netflix, Spotify, Hulu, Disney+)	\$50–\$80	GPS adds the cost of 2–3 streaming services

The Bottom Line: You're Buying Peace of Mind

What Parents Are Saying

"I told my daughter: 'I'm paying for your tuition, your housing, and your flights. I'm also paying for this. It's non-negotiable.' She rolled her eyes. Then she got lost in Barcelona at midnight, pressed the button, and someone walked her home. She called me the next day and said, 'Thank you. I get it now.'"

— David, parent of semester student in Spain

"My son had a medical scare in London. He was dizzy, confused, and alone. He opened the app, pressed the hotline, and they guided him to the nearest, adequate hospital, called ahead, and stayed on the phone until he was checked in. I can't imagine what would have happened if he'd been trying to figure it out alone."

— Lisa, parent of academic year student in the UK

"I thought about skipping this to save money. Then I realized: I've spent \$22,000 on her semester abroad. What's another \$3,000 to make sure she's safe? It's the best money I've spent on this entire experience."

— Mark, parent of semester student in Italy

Without GPS	With GPS Student Safety Passport
You hope they'll figure it out.	You know they have professional help.
You worry every time your phone rings at odd hours.	You sleep better knowing someone is always there.
You refresh news sites when something happens in their city.	You have a direct line to the team watching over them.
You feel helpless from across the ocean.	You have boots on the ground in Europe.

Pricing at a Glance

One-time deployment fee (if an agent is physically sent): \$1,200

Most students never need this—but if they do, it's priceless.

Plan	Duration	Total Cost	What That Covers
Student Pass	Per month	\$798	Full protection for the entire month
Summer Pass	8 weeks	\$1,596	Full protection for the entire program
Semester Pass	4 months	\$3,192	Full protection for the semester
Academic Year Pass	9 months	\$5,886	Full protection + save \$1,296

The Company Behind the Service

GPS Global Protection Shield is not a tech startup. We are a mission-critical security firm operating in 90+ countries, protecting corporate executives, government personnel, and international travelers. We have security agents positioned within a two-hour radius of all major universities in Europe, ensuring rapid on-site support when needed. We bring the same elite protection to your student.
